

LIBRARY SCIENCE (LIB)

LIB-101 Essentials of Library Research and Information Competency 1 Unit (LEC 16-18)

This course will guide students through the research process, using both library resources and the Internet. Students will learn how to search a variety of electronic databases, library catalogs, and Internet sources for relevant and authoritative information and prepare a works cited list or bibliography using the MLA or APA format. This course will prepare students for research in any discipline and will impart the information competency skills necessary to become a lifelong learner.
