

# BIOLOGY

## Program Description

View on YouTube (<https://www.youtube.com/watch?v=kIMlqOb4ER8>)

Biology will change your life because you will learn about yourself and the world around you. Biologists study how humans, animals and other organisms function and interact. It is essential for understanding the facts about topics such as vaccines, climate change, and genetically modified organisms. This will help you make more informed decisions about things that greatly impact you and your loved ones. Biology is required for medical and environmental careers.

## Transfer Preparation

Transfer students are advised to do research on prospective majors and careers. The MSJC Transfer Center and MSJC catalog can be helpful tools. Students interested in transferring to CSU's or UC's can access major preparation by visiting ASSIST (<http://www.assist.org>). All students are advised to meet with a counselor at least once a semester to create or update their comprehensive education plan.

## Degrees/Certificates

### Degrees

#### Transfer Degrees

- Biology, A.S.-T (<https://catalog.msjc.edu/instructional-programs/biology/biology-as-t/>)

## Program Learning Outcomes

- Students through persistence will develop problem solving skills in science thinking both critically and abstractly about issues using science as the foundation for understanding.
- Students will gain scientific awareness with a flexible approach including a willingness to change perspectives and an ability to weigh alternative options while staying rooted in the understanding of their impact as local, national, and global citizens.
- Students will apply past knowledge to new scientific situations, being able to think abstractly regarding science and communicate this newfound knowledge in the language of science and the scientific method.
- Students will achieve literacy in the language of science and the scientific method, demonstrating a willingness to respond with wonderment and awe with regards to the physical and biological principles of science, and gather data through all senses.

- Students will learn hands-on skills in the laboratory, demonstrate how to measure and collect data from experiments with accuracy and precision, and think critically about the results.
- Students will learn hands-on skills in the laboratory, demonstrate how to measure and collect data from experiments with accuracy and precision, and think critically about the results.

## Careers and Salaries

Discover in-demand careers and education options based on your interests! See the list of careers below or explore further by searching for **Careers or Programs** (<https://msjc.emsicc.com>).

Note: There are no guaranteed positions for students completing these programs. Education and work experience required will vary by employer. The salary and benefits for specific occupations will be dependent on work experience, education, background, and employer. Labor market statistics are from the Bureau of Labor Statistics, US Census Bureau, O-NET, EMSI.

| Career/Industries                            | CA Annual Median Salary or Range | Employment Demand or Opening CA |
|--|----------------------------------|---------------------------------|
| Family Medicine Physicians (D)               | \$228,820                        | 678                             |
| Dentists (D)                                 | \$167,181                        | 987                             |
| Geneticists (M, D)                           | \$109,855                        | 1,476                           |
| Zoologists and Wildlife Biologists (B, M, D) | \$83,526                         | 166                             |
| Biologists (B, M)                            | \$109,855                        | 1,476                           |

(degree required: SM some college, C: Certificate, A: Associate degree, B: Bachelor's degree, M: Master's degree, D: Doctorate)
