

DRONE APPLICATIONS IN GEOSPATIAL INFORMATION SCIENCE CERTIFICATE

A certificate in Drone Applications in Geospatial Information Science will be issued for the completion of seven courses for a total of 20 units. The Drone Applications in Geospatial Information Science is a unique certificate which introduces students to the use of drones in GIS. Drone technologies aid in the collection, organization, and analyses of layers of information never before possible. Students will develop the unique capabilities that drones provide for the collection of information which helps GIS technicians reveal deeper insights into data, such as patterns, relationships, and real-time situations.
