

HORTICULTURE, A.S.

The non-transfer Degree Program in Horticulture is primarily designed to prepare the student for entry into careers associated with golf course management, turf management, or other green industry. This program specifically provides students with a strong foundation in turf management, water usage, fertility, soils, horticulture, and human resource management for golf courses, recreational parks, sports fields, and general landscape areas. This program also prepares students to enter the job market as a golf course superintendent, field crew supervisor, irrigation technician, equipment manager, grounds person for parks, cities, and school districts, or field crew foreman for landscape contractors. This program will offer a more well rounded education experience and require the student to attain their general education as well as the classes within this degree program.
