

# TEACHER EDUCATION AND DEVELOPMENTAL STUDIES

## Program Description

For many college students, working in a career where individuals can make a positive impact on children's development is an academic and professional goal. The Teacher Education and Developmental Studies (TEDS) Department is committed to being a leader and partner in preparing our community of diverse learners to become competent, caring, and reflective educators and professionals who will advocate for and empower children and families in the 21st century. Our certificate and degree programs offer both practical foundation and on-site training for students interested in working with children from infancy to adolescence.

The study of development and education will help you learn to think with rigor, write with objectivity and precision, and create with intention and purpose. TEDS offers a transfer degree in Elementary Education, Early Childhood Education, Child and Adolescent Development, and a non-transfer degree in Early Intervention and Inclusion. TEDS also offers certificates aligned with the California Child Development Permit Matrix and California Preschool Learning Foundations and Framework.

The following are considered to be essential functions for progression, and completion of the TEDS programs. In compliance with the American Disability Act and California Community Care Licensing, students enrolled in TEDS programs must be, with reasonable accommodations, physically and mentally capable of performing the essential functions of the program in the classroom, during observations, and in their fieldwork setting. The essential functions listed are not intended as a complete listing, but a sample of the types of abilities, needed by the TEDS student, in order to meet the program objectives and requirements: Physical Demands - ability to lift 25 lbs or more, prolonged standing/walking, pushing, reaching, bending, kneeling, and crouching; Sensory Demands - ability to see clearly 25 feet or more and see 20 inches or less; Mental Demands - ability to function in busy environments, unpredictable situations, face occasional pressures and multiple requests from children and adults, and handle emergencies or crisis situations.

Students will also be required to provide documentation of influenza shot (TDap), pertussis, and measles immunization, as well as TB clearance to as required by SB792 in order to complete certain courses. Students may also be required to complete a DOJ fingerprint clearance process before they begin their OI or field experience courses.

Additionally, as part of course requirements, students should be aware that any criminal charge(s) on their record may prevent them from completing certain courses, obtaining their certificate or degree and becoming employed in any occupation involving children.

All California State Permit eligible coursework including the state-required General Education coursework must be completed with a minimum grade of "C" (2.0) or above. For more information on permit requirements visit: [www.childdevelopment.org](http://www.childdevelopment.org).

## Transfer Preparation

MSJC offers a range of course work to prepare students for the workforce or to transfer to four-year colleges and universities. All four-year institutions prescribe their own standards for course evaluation and admissions. Courses that fulfill major requirements for an associate degree in this program might not be the same as those required for transfer into a similar major at a four-year university.

Transfer students are advised to do research on prospective majors and careers through the Career/Transfer Center and the MSJC catalog. Students interested in transferring to CSU's or UC's can access major preparation by visiting <http://www.assist.org>. All students are advised to meet with a counselor at least once a semester to create or update their comprehensive education plan.
